

First look at Feadship *Project 822*

The latest Feadship to enter its completion stages, *Project 822*, eased out of her Kaag Island drydock today and into public view for the first time since her bare hull arrived in 2021.

This large-volume 75.70-metre superyacht features exterior design by the renowned British firm RWD who also designed the interior in collaboration with Susan Young Interiors. Naval architecture is by Feadship De Voogt Naval Architects. Now that she has slipped the confines of her building shed, the stylized mast can be fitted to her top deck.

Feadship will be sharing more information on this full custom new member of the fleet closer to the official launch date.
